Attention: All Trade Members

Severe weather conditions in Western Europe have caused congestion at some overseas ports. LCBO Logistics has been working with the freight forwarders to move containers as quickly as possible. The LCBO has also been advised of issues at the port of Montreal due to equipment shortages with CN Rail.

Unfortunately, we will be experiencing rolling stocks outs for some items from Western Europe over the next couple of weeks. These stock outs are particularly noticeable in the Beer and Spirits areas.

I anticipate this situation will return to normal shortly. Please feel free to direct any specific questions to the applicable Inventory Manager.

Best regards,
